

## TOOLBOX OF RESOURCES

**Tool name:** ChatGPT

**Category:** Accessibility and Language

**Official website link:** <https://chatgpt.com/>

### Available languages:

- Interface available in: EN, DE, IT, FR, etc.
- Supports multiple languages

### Free version available?:

Yes, ChatGPT 40

### Short description:

ChatGPT is a generative AI chatbot developed by OpenAI and is known for its ability to engage in human-like conversations and produce various forms of text. It uses large language models, including GPT-40, to understand user input and produce responses that are often indistinguishable from human ones. It can be used for a wide range of tasks, such as answering questions, writing various types of texts, etc.

### Key benefits:

- Ability to understand and produce texts as if they were produced by a human.
- Works online or via a desktop application.
- Can translate into multiple languages, ensuring accessibility.
- For people with speech and hearing impairments, ChatGPT can produce text responses and a summary of spoken content.
- Provides information and insights across a variety of topics and disciplines.
- For content creation, coding assistance, and even personalised support.

### Limitations:

- Lack of common sense and reasoning, as it does not operate on genuine understanding.
- Difficulties with tasks that require real-world knowledge, logical reasoning, or understanding context.

- Grammar and spelling difficulties.
- Multilingual limitations.
